

ENDO|ANATOMY

NAVIGATING THE RETROPERITONEUM FOR PRECISION SURGERY

Pre-Congress Live Cadaveric Dissection Workshop

OVERVIEW

Step into the anatomy lab and elevate your surgical practice with **ENDO|Anatomy**—a transformative, expert-led cadaveric dissection workshop designed to give you unparalleled command of the retroperitoneal space.

Taking place as a pre-congress highlight of the EEL Congress 2026 in Bologna, this half-day intensive course immerses participants in the core anatomical and surgical principles that underpin functional, nerve-sparing endometriosis surgery.

Whether you're a trainee refining your anatomical roadmap or an experienced surgeon mastering neuro-pelviology and inter-fascial planes, **ENDO|Anatomy** is your gateway to surgical precision and confidence.

WHO SHOULD ATTEND:

- Gynaecology trainees & fellows
- Advanced laparoscopic and robotic surgeons
- Endometriosis specialists
- Urogynaecologists
- Gynae-oncologists with an interest in pelvic nerve anatomy

WHAT YOU'LL GAIN:

- Real-time cadaveric demonstration by internationally renowned faculty
- Strategic dissection of pelvic spaces with expert commentary
- Advanced tips on ureterolysis, vascular control, and nerve protection
- Insight into translating cadaveric skills into complex live surgery
- Direct access to leading figures in functional endometriosis surgery

WHY ATTEND:

ENDO|Anatomy goes beyond theory—it's a live surgical roadmap, delivered in real time, for those striving to operate with clarity, safety, and anatomical excellence. Reserve your place now and join an elite group of surgeons shaping the next era of endometriosis care.
