STRATEGIC DECISION-MAKING FOR CHALLENGING CASES & COMPLICATIONS WITH ENDOMETRIOSIS

Pre-Congress Workshop

OVERVIEW

This interactive, case-driven workshop is designed for gynaecologists, Endometriosis Specialists, colorectal surgeons, radiologists, and other allied specialists involved in the multidisciplinary management of complex endometriosis. Rather than a traditional lecture format, real-life scenarios will be discussed in a live MDT setting, simulating real clinical decision-making with cross-specialty input.

CALL FOR CASES

DELEGATES ARE INVITED TO SUBMIT ANONYMISED COMPLEX CASES BY 15 JANUARY 2026. FIVE SELECTED CASES WILL BE FEATURED IN SESSION 5 AND ACKNOWLEDGED IN THE WORKSHOP BOOKLET.
